The Trend Is to Metal for Modern Beauty and Performance

THE most outstanding tendency in the building industry today is the increasing use of metal for all types of structures. The striking features of America's latest skyscrapers have been achieved through the use of metal.

Recent developments in modern design together with new practical ideas for application now make Milcor Steel Ceilings unsurpassed in producing fine, artistic effects adapted to every type of structure.

Architects, contractors and owners have for years appreciated the advantages of Milcor Metal Ceilings. The best thought and skill of the most accomplished designers and artisans in ornamental metal are embodied in each Milcor unit. The motifs are authentic, their detail correct, their treatment finished.

In the beautiful church interior illustrated above Milcor Spanish Texture is used to give the ceiling its exceptional attractiveness as well as to permanently protect those who attend religious gatherings. It is the St. Paul's English Lutheran Church at Waterloo, Wisconsin. Rev. F. O. Broesicke, Pastor.

Shown above is the attractive interior of the furniture store owned by C. A. Schweinle, located in Oklahoma City, Oklahoma.

Due to the increased amount of light reflected by Metal Ceilings, merchandise can be displayed to better advantage. This is especially desirable in furniture stores and display rooms where a large area must be illuminated. The many advantages of Milcor Metal Ceilings can be obtained at nominal cost.

There are no ceilings as appropriate for retail stores as those made of metal by Milcor. Their permanent protection, economy, and freedom from maintenance make for lasting satisfaction.

Large stocks easily damaged by fire and water are protected by Metal Ceilings. Tests prove these ceilings resist heat as high as 1700 degrees for one hour and fifteen minutes. The resistance offered by Metal Ceilings frequently means the difference between localized damage and total destruction.

Milcor Spanish Texture lends itself appropriately to the finest and most modern drug stores, as evidenced by the illustration of the Coolidge Drug Company, Chicago, shown above.

In fact, Milcor Spanish Texture is adaptable to almost every type of building requiring metal walls and ceilings. Its unbroken beauty is largely responsible for its widespread popularity. As are all Milcor Ceiling Designs, Spanish Texture is easily applied and with an occasional coat of paint it retains its beauty for a long period of time.

This design resembles plaster so closely that it is impossible to determine that it is metal except by the most careful examination. No cracking or dropping away from the ceiling can occur when Spanish Texture is used. Shocks and strain do not hurt this ceiling.

Spanish Texture Metal Ceilings and Walls

COMBINATION DESIGN No. 4000

Composed of: FIELD PLATE No. 4001 in sheets 24"x48" (For Details Consult Page 25)

CORNICE....No. 4010, 2 1/2" Projection, 5" Drop (For Details Consult Page 30)

MITRES....Nos. 4010-"A" Inside and 4010-"B" Outside (For Details Consult Page 30)

LIST PRICE

|---|----------------|-----------------------|--------------|
| FIELD PLATE No. 4001..... | 8c Per Sq. Ft. | CORNICE No. 4010..... | 10c Per Foot |
| MITRES Nos. 4010A Inside and 4010B Outside..... | | 40c each | |

Color toned walls and ceilings suggesting the Spanish motif in architecture have become universally popular. Milcor Metal Ceiling and Wall Design No. 4000 was created in response to this demand.

Walls and Ceilings in new and old buildings done with this Milcor Spanish Texture metal finish

take on new character. When painted in plaster tint effects, this new design forms pleasing, modern interiors, firesafe and permanent.

Complete instructions for the erection of Milcor Spanish Texture Ceiling and for painting it to reproduce an antique plaster effect will be sent upon request.

MILCOR STEEL ROOF DECK

10 REASONS WHY YOU CAN'T AFFORD ANYTHING BUT STEEL ROOF DECK

1. Lower in cost than any other type of roof with equal insulating efficiency.
2. Fireproof — non-combustible deck.
3. Permanence — no quick disintegration under leakage.
4. Ease of Attachment with clips or welding — to practically any structural member.
5. Adaptability to real insulation with standard types of insulation board.
6. Adaptability to any construction — bow truss, monitor, sawtooth, or almost any odd-shaped design.
7. Firmly interlocked, continuous base.
8. Light weight ($\frac{1}{3}$ to $\frac{1}{2}$ less than some types) requiring lighter, less costly supporting structure.
9. Perfectly smooth deck — longer life for roof covering.
10. Clean-cut appearance.

MAKES A GOOD LOW-COST JOB

A big part of the roofing job is Milcor Steel Roof Deck. Practically every store, filling station, warehouse, industrial building is a possible job — not only on the roof, but also for other uses of Milcor Steel Deck.

Milcor Deck goes on in a hurry, on any type of building construction. Sections nest so easily it makes a fast-running job and a satisfactory one.

A perfect base for real insulation. Perfectly smooth — clean-cut — non-combustible — permanent. Light in weight, easily handled, requires minimum support. Unique offset permits nesting sections with incredible speed. Send for free Milcor roof deck bulletin.

SPANISH METAL TILE ON STORE ROOF

AMERICAN METAL TILE ON FILLING STATION ROOF

SPANISH TILE, METAL SHINGLES, SKYLIGHTS, VENTILATORS, AND OTHER METAL BUILDING PRODUCTS

The name Milcor has always been synonymous with high quality. It is fortunate, then, that the Milcor line includes an endless variety of sheet metal building products, each one a leader in its particular field.

Among the most interesting of Milcor products are the Spanish Tile and American Metal Shingles. They have definitely set the style in metal roofs. But they are more than good looking. They are fire-safe, weather-proof, proof against cracking, and decidedly economical.

Skylights of every description are also offered by Milcor. They are built for efficiency and guaranteed to be satisfactory.

Milcor Ventilators are known all over the world for their efficiency, their sturdy construction and the genuine satisfaction built into them.
